

MAC VALUE WITH GROWTH PORTFOLIO DESCRIPTION

The investment objective is long-term capital appreciation through a portfolio of domestically-traded equities. We focus the portfolio on 20 – 25 companies with reasonable valuations that we view offer the best opportunities for growth. We seek out companies with scalable financial models, compelling secular growth characteristics, strong balance sheets and management teams that demonstrate a commitment to creating shareholder value, without constraining ourselves to specific sectors or market capitalizations. Accounts are separately managed, long only and do not utilize derivatives.
